12.2019 – 01.2021 | Remote

PieShares is a digital marketplace for small and local merchants to easily sell & advertise their products or services while giving the option to donate a percentage of the revenue to a charitable cause.

- Design client-side and server-side architecture.
- Designed and developed APIs.
- Ensured cross-platform optimization for mobile devices.
- Troubleshoot, and debug the production branch.

PROJECTS

AnimetTV [↗](#)

10.2020 – present

AnimetTV is an adaptive smart indexer that organizes and embeds media crawled from various third-party sites, but without any intrusive popup ads and trackers. it can recognize animes from just one picture using A.I.

- Client-side DOM manipulation to help further pervert intrusive ads & trackers.
- Boosted overall visitor traffic by 25% by scaling the backend nodes horizontally.
- Maintained an average customer attention time of 8 minutes.
- Utilizes many techniques to clean and filter streams to remove any intrusive popup ads and trackers.
- Uses over 12 proxy servers to hide all user traffic.

Portfolio Website [↗](#)
